

FlashBot Arm

Semi-Humanoid Embodied AI Service Robot

Intelligent Decision Making

Autonomous Precision Operation

Proactively Adapt to Scenarios

Multimodal Natural Interaction

Multiple Security Protections

Seamless Navigation

VSLAM+ solution supports multi-floor mapping. The robot can press elevator buttons and swipe access cards with its hands, adapting to various scenarios without modifications.

Intelligent Decision-Making

Autonomously recognize the environment, understand tasks and execute precisely.

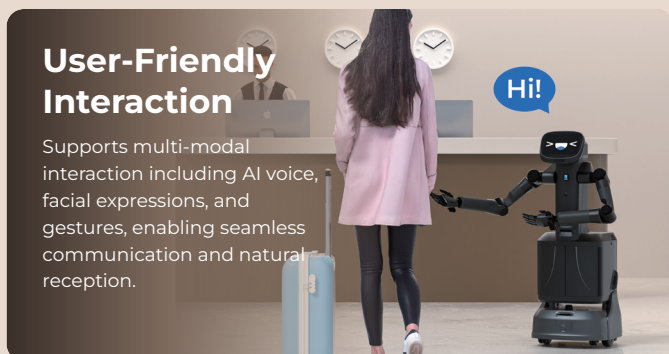

Autonomous Operation

Maximum operating diameter of 2 meters with 7-DOF dual arms that can be lifted. Supporting more intricate operational tasks with PUDU DH11 dexterous hands.

User-Friendly Interaction

Supports multi-modal interaction including AI voice, facial expressions, and gestures, enabling seamless communication and natural reception.

Safe and Reliable

Comprehensive sensing through vision and tactile sensors, combined with compliant force control algorithms, ensures a safe interaction between humans and robots.
